"FRANCES." NEWSPAPERS AND ADVERTISING -The Philadele phia Bulletin, after making some very timely suggestions on the duties of the current year, comes is as applicable here as in Philadelphia:

Finally, make a resolve-if you are in any sort. of business, that you will push it with all the economy, liberality, spirit and enterprise you can mas ter-and by way of taking a fresh start and combining the whole four in one vigorous effort, the best thing you can do is, beyond question, to take a CONLEY & JOHNSON newspaper, and send to it a good long advertisement-one of that kind which not only makes it certain that your name will be seen by all the world, but which also proves that you are doing a first rate business, and can afford to make it known, The world loves to patronize those whom it thinks are doing well-and liberal advertising is an unfailing sign of prosperity, as times go. Of all habits, this is, beyond question, one of the very best to form at the beginning of the year, and as such we sincerely commend it to all friends and readers.

master touches on almost everything. The ceilings over us and the carpets we tread on, are hallowed by Art. Art winds the railway through the mountains and the mudmakes her machines of wood and fron, to act as if with knowledge and annihilates space with lightning tamed down to the tuteledge of a boy. Nothing is too lofty for her touch and nothing too humble. A new proof of this old conviction has just fallen under our notice, in the shape of a CATHARrid Part, from the Laboratory of that world renowned Chemist, Dr. C. J. AYER.

If we understand the subject, he has earried that article to the farthest perfection of which it is capable. Instead of imploying Drugs in its composition, as we have always thought the necessary and only way, he has with consummate skill extracted the wirtness of the medicine to be employed and combined them alone in their purity together. The composition is then mixed and rolled by machinery and steam power into a speroid pill which is wrapped in an enrelope of gelatine, for protection from the effects of weather or time, and then thickly coated with sugar, to serve as its passport over the palate. Notwithstanding all the labored perfection they are offered to the Public at less than one centeach. Pianos and Music. - We learn that Horace Waters, of 583 Broadway, N. Y., agent for the sale of many of the most celebrated makers of Pianos and Meledeons, is offering them at prices which we advise all who desire to parchase to avail themselves of. He is also selling his large and well-known Ontalogue of Music at one-third off from the regular prices, and will forward the same free of postage. His offers to the trade, teachers, and schools, are of the most favorable character-all of which he wil be able to fill to the ctler, for having wisely adopted the cash system. The Sorace Waters' Pianos are known as among the very best. We are enabled to speak of those instruments with some degree of confidence, from personal knowledge of their excellent tone and durable quality,-N. Y. Econgelist.
